PYTHON, C, C++, SQL, OPEN CV, TENSORFLOW AND KERAS,

## WORK EXPERIENCE

Internship at Sinarmasland for 3 months at the IT department as a IT security:

In this role my job is to hunt threats like C&C, Trojan, ransomware, phishing, etc. And then report it to my supervisor using trend vision one, trend micro, and trend email security.

Sometimes I'm also tasked to go to the datacentre and update the excel table by checking what rack is this switch at, which port that has no device and that has device, which switch is dismantled, and which switch is relocated.

Internship at Zettabyte for 4 months at the developers department as an AI intern:

In this role my job is to fix bugs, implements distance algorithms, like Manhattan distance, cosine similarity, and etc. And also improving the headers filter and improving the accuracy of the plagiarism checker on their plagiarism software named dossier pro.
